Sujith Kamasani Srinivasa Reddy

Tempe, AZ | (602) 793-1019 | sreddy60@asu.edu | LinkedIn

Summary

Construction Management graduate student at ASU with hands-on experience in project coordination, structural design, QA/QC, and construction documentation, supported by a strong academic foundation in cost estimation, subcontractor selection, bidding, and bid leveling. Proficient in Procore, Bluebeam, Revit, and InEight. Actively seeking a Co-op or Internship to apply construction knowledge across real projects and grow from preconstruction through closeout.

Education

Arizona State University — Tempe, AZ

M.S. Construction Management and Technology — *Aug. 2025 – May 2027*

- Coursework: Construction Project Management, Sustainable Construction, Infrastructure Construction Estimating, GMP – Trade Partner Selection, Information Technology in Construction

R.V. College of Engineering — Bengaluru, India

B.E. Civil Engineering — *Nov. 2020 – June 2024*

- Coursework: Structural Analysis, Construction Project Controls, Design of Concrete Structures, Geotechnical Engineering, and Surveying

Experience

Graduate Student Assistant — Jan. 2026 – Present

Arizona State University — *Tempe, AZ*

- Supported course operations through documentation management, coordination, and tracking deliverables, aligning with project administration workflows.
- Managed communication between students and faculty, strengthening organizational, scheduling, and stakeholder coordination skills.

Structural & Project Engineer Intern — Nov. 2024 – Mar. 2025

DesignTree Service Consultants

- Worked closely with design and site teams throughout preconstruction and execution, making sure work on the ground matched the approved drawings, specs, and project scope.
- Got hands-on with structural design of high-rise residential buildings in ETABS — ran load analysis and cross-checked results against code to make sure everything held up.
- Helped prepare, issue, and track submittals and construction documents; caught drawing discrepancies early, coordinated fixes with the design leads, and kept the project records clean.
- Visited the site regularly to check progress, verify quality against the plans, and feed findings into QA/QC reports and field documentation.

Graduate Coursework & Project Highlights

Subcontractor Bid Analysis & Trade Partner Selection | *GMP – Trade Partner Selection*

- Reviewed subcontractor bid packages, dug into scope inclusions and exclusions, went back to subs with clarification questions, ran bid leveling across all proposals, and worked through the analysis to land on the right trade partner.

Heavy Civil Cost Estimating — Highway & Underground Utilities | *Infrastructure Construction Estimating*

- Built out unit-price bids and WBS-based cost breakdowns using Bluebeam for takeoffs and InEight to pull the estimate together — solid practice on the tools and workflows you see on real GC and CM projects.

Construction Operations & Productivity Study | *Construction Project Management*

- Went out to an active project and conducted work sampling, MPDM productivity analysis, process flow mapping, and a safety risk assessment — then turned those findings into concrete improvement recommendations.

BIM, Reality Capture & Emerging Construction Technologies | *Information Technology in Construction*

- Used Revit for BIM coordination and explored drone-based reality capture, AI tools, and site documentation tech to see how they improve constructability reviews, coordination, and overall project productivity.

Technical Skills

Construction & Design Tools: Microsoft Office, Procore, Revit, Bluebeam, InEight, AutoCAD, ETABS, PLAXIS 2D
Core Competencies: Construction Coordination, Project Scheduling, Site Inspections & QA/QC, Construction Documentation, Stakeholder Communication, Construction Project Management
Soft Skills: Learning Agility, Effective Teamwork, Strong Leadership, Time Management, Clear and Impactful Communication, Critical Thinking, Strategic Problem-Solving

Certifications

LEED Green Associate | Procore Project Management Certified

Leadership & Activities

Volunteer — Jun. 2023 – Aug. 2023

Agasthya International Foundation

- Mentored students and led community initiatives, demonstrating teamwork, communication, and leadership in a structured, goal-oriented environment.
